

2023* Electric Supply Environmental Attribute Information

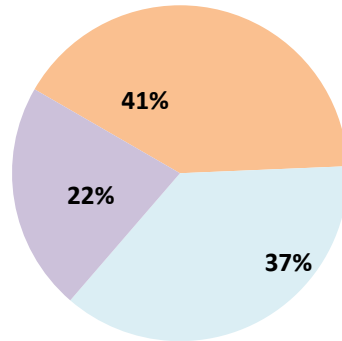

Town of Nantucket PowerChoice Program

The electric supply product you have purchased from First Point Power meets the minimum requirements of the Commonwealth's Renewable Energy Portfolio Standard.* By law, First Point Power is required to disclose to customers the following non-price information related to the product: (i) power sources; (ii) air emissions; and (iii) labor characteristics.

*Date label was generated

PowerChoice - POWER SOURCES

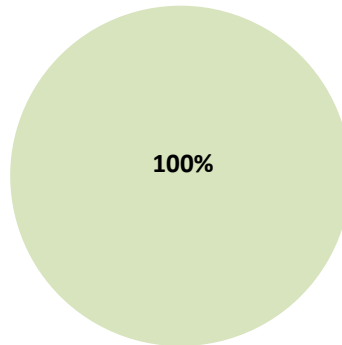

Renewable Portfolio PowerChoice Resources	
MA Class I RECs to meet RPS requirements	22%
Other RECs to meet RPS requirements	37%
Total	59%

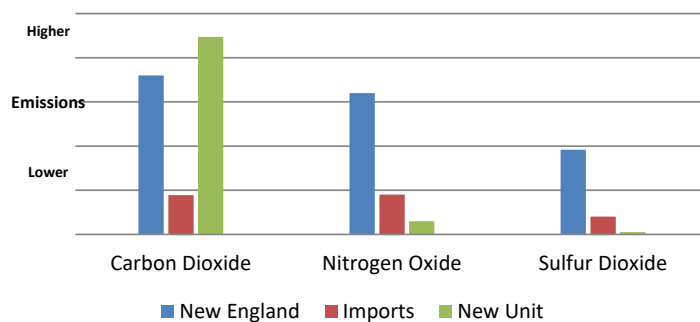

System Power	
Total	41%

PowerChoice GREEN - POWER SOURCES

Renewable Portfolio PowerChoice Green Resources	
MA Class I RECs	100%
<small>*Also includes additional RECs to meet other MA clean energy requirements</small>	
Total	100%

AIR EMISSIONS

The production of electricity to support your product results in the emission of air pollutants such as carbon dioxide, nitrogen oxide, and sulfur dioxide. This graph compares the air emissions of (i) the regional system average, (ii) imports to New England, and (iii) a new natural gas power plant.

*The graph is based on 2022 & 2023 data, which is most recent data available

LABOR CHARACTERISTICS

24% of the product's electricity came from power sources with union contracts with their employees.

NOTES

* For more information on the Renewable Energy Portfolio Standard, visit the Massachusetts Department of Energy Resources website at <https://www.mass.gov/orgs/massachusetts-department-of-energy-resources>.
