

Canton Electricity Choice

Municipal Aggregation Plan

January 29, 2024

The Town of Canton (Town) developed the Canton Electricity Choice Program (CEC Program or Program), which is often referred to as a municipal aggregation program. The CEC Program is designed to bring the benefits of renewable energy and electricity choice to its residents and businesses, and to help the Town achieve its sustainability goals. The CEC Program will integrate additional renewable energy into the power supply and will offer a selection of supply options as well as the ability to leave the CEC Program and return to utility Basic Service at any time with no penalty or fee.

This document, the Municipal Aggregation Plan (Aggregation Plan), sets forth the key components of the CEC Program for review and approval by local and state officials.

I. Key Features

The key features of the Town's CEC Program will include:

Renewable electricity: The Town will seek to increase the use of power from renewable resources such as wind and solar.

Price stability: The Town will seek to provide greater price stability when compared with utility Basic Service prices by entering into a series of competitively-bid electricity supply contracts for fixed-price periods such as one-to-three years.

Competitive pricing. The Town will also seek to provide competitive prices and possible cost savings, but savings cannot be guaranteed.

Automatic enrollment and opting out: Eligible customers¹ will be automatically enrolled in the CEC Program unless they opt out. Customers can opt out of the CEC Program at any time, either before enrollment or after, with no fee.

II. CEC Program Options

The Town will give CEC Program participants a choice in the percentage of renewable energy and price of their electricity supply by offering multiple Program Options. Because the integration of renewable energy into the Town's power supply is a driving motivation for the CEC Program, the Town anticipates offering a level of

¹ Eligible customers shall include (1) basic service customers; (2) basic service customers who have indicated that they do not want their contact information shared with competitive suppliers for marketing purposes; and (3) customers receiving basic service plus an optional green power product that allows concurrent enrollment in either basic service or competitive supply. Eligible customers shall not include: (1) basic service customers who have asked their electric distribution company to not enroll them in competitive supply; (2) basic service customers enrolled in a green power product program that prohibits switching to a competitive supplier; and (3) customers receiving competitive supply service. Order on Eligible Customers, D.P.U. 16-10, at 19 (2017).

renewable energy above the state minimum requirement, known as the Renewable Portfolio Standard (RPS), in some of the CEC Program Options. Specifically:

1. Canton Standard Green²

The CEC Program will provide a Standard, or default, option that includes a higher percentage of renewable energy content than is included in utility Basic Service. The additional renewable energy content will come from additional Renewable Energy Certificates (RECs)³ over and above the RPS requirement. The additional RECs may be Class I RECs, or other types of RECs, or a combination. Canton Standard Green will have a lower percentage of additional Class I RECs than Canton Plus Green and will have a higher percentage of additional RECs than Canton Basic.

The percentage and type of RECs will be established by the Town Administrator with policy direction from the Select Board and input from the Town's Energy Advisory Committee. The Town Administrator will do so after conducting a competitive procurement and receiving price bids and in consideration of factors including: cost; environmental impact; Massachusetts renewable energy requirements; and the percentage of additional RECs offered by peer communities and the impact, if any, on customer participation rates. The percentage and type of RECs may change after they are initially established. Program participants will be notified before any such change. The percentage and type of RECs will be disclosed in the Opt-Out Notification, Program website, and other communications regarding the Program.

2. Canton Plus Green

The CEC Program will also offer an additional option that includes more renewable energy than Canton Standard Green (up to 100%) in order to give residents and businesses more freedom to make individual decisions about the price and environmental impact of their power supply. The additional renewable energy content will come from additional RECs over and above the RPS requirement. The additional RECs may be Class I RECs, or other types of RECs, or a combination. The percentage and type of RECs will be established and disclosed using the same process and factors as for Canton Standard Green.

3. Canton Basic

In addition, the Town will offer a third option, Canton Basic, which is similar to the utility Basic Service currently offered by Eversource, the local electric distribution company serving Canton. Canton Basic includes no additional renewable energy above state minimum requirements. However, this option is expected to provide greater price stability than utility Basic Service, and may result in lower prices overall during the time of the contract than utility Basic Service, although savings cannot be guaranteed. The Town will conduct a competitive procurement and establish the price after it receives price bids.

² Program options with the word "Green" in the name contain renewable energy content (RECs) above the minimum required by state law.

³ A REC represents the environmental attributes associated with electricity generation. RECs are part of an accounting system that enables generators to sell, and customers to buy, renewable electricity. Class 1 RECs, also known as "premium" RECs, come from generators that are fueled by renewable sources such as the sun and wind, began operating after 1997, and are located in, or deliver power to, New England.

III. Procedural Requirements

The Municipal Aggregation Statute, [G.L. c. 164, § 134 \(Aggregation Statute\)](#), sets out the legal requirements for a municipal aggregation plan. Those requirements include procedural requirements, specified plan elements, and substantive requirements. The procedural requirements are discussed below, and the other requirements in the sections that follow.

1. Local Approval

The Aggregation Statute provides that a town may initiate the process to aggregate electrical load upon authorization by a majority vote of town meeting. The Town obtained such authorization by vote at its Town Meeting on May 22, 2021. A copy of the Town Meeting vote is provided as Attachment A to Exhibit 3 of the Town's Petition for Approval of Municipal Aggregation Plan (Petition).

2. Consultation with the Department of Energy Resources

The Aggregation Statute also requires the Town to consult with the Department of Energy Resources (DOER) in developing its aggregation plan (Plan). The Town submitted a draft of its Plan to DOER, and Town officials discussed the draft with DOER on March 2, 2023. DOER's consultation letter is provided as Attachment B to Exhibit 3 of the Town's Petition.

3. Citizen Review

The Town made the Plan available for review by its citizens by posting this Plan for comment and holding a public meeting on January 24, 2023. For more detail about the citizen review process, please see Attachment A, the Canton Education and Outreach Plan. Comments received are attached as Attachment G to Exhibit 3 of the Petition.

IV. Elements of the Aggregation Plan

The Aggregation Statute requires that the Plan contain the following elements:

- Organizational structure
- Operations
- Funding
- Details on rate setting and other costs to participants
- The method of entering and terminating agreements with other entities
- The rights and responsibilities of Program participants
- The procedure for termination of the Program

Each of those elements is discussed in turn below.

1. Organizational Structure

The organizational structure of the Canton Electricity Choice Program will be as follows:

Select Board, Town Administrator and Canton Energy Advisory Committee: The CEC Program will be overseen by the Select Board and the Town Administrator. The Select Board will set the policy direction and is the contracting

authority for the CEC Program. The Chair of the Select Board will sign the Competitive Electric Service Agreement.⁴ The Town Administrator will approve the plan, manage the consulting team, and coordinate with the Canton Energy Advisory Committee (CEAC). The CEAC, which is appointed by the Select Board, provides direct assistance and advice to the Town Administrator and Select Board.

Consultant: The Town's aggregation consultant (Consultant) will manage the aggregation under the Town Administrator's direction. The Consultant's responsibilities will include managing the supply procurement, developing and implementing the public education effort, interacting with the local distribution company, monitoring the ESA, maintaining the aggregation website, providing customer service, and producing required reports. The Town has selected MassPowerChoice, LLC to provide these services for an initial term.

Competitive Supplier: The Competitive Supplier will provide power for the aggregation, provide customer support including staffing a toll-free number for customer questions, and fulfill other responsibilities as detailed in the ESA.

2. Operations

Following approval of the Aggregation Plan by the Department of Public Utilities (DPU), the key operational steps will be:

- a. Issue a Request for Qualifications (RFQ) and Request for Prices (RFP), and select a winning Competitive Supplier
- b. Implement the public education effort for the approved Plan, including notice of the specific features and prices for CEC Program options and of the opt-out period, and resources to obtain additional information and implement consumer choices
- c. Enroll customers and provide service, including required information disclosures
- d. Submit reports to the DPU and DOER

a. Issue a Request for Qualifications and Request for Proposals and select winning Competitive Supplier

After the DPU approves the Plan, the next step is to procure the electricity supply.

The Town will issue an RFQ to leading competitive suppliers, including those currently supplying aggregations in Massachusetts and other states. The RFQ will require that the supplier satisfy key threshold criteria, including:

- Licensure by the DPU
- Strong financial background
- Experience serving the Massachusetts competitive market or municipal aggregations in other states
- Demonstrated ability, supported by references, to provide strong customer service

In addition, suppliers will be required to agree to the terms and conditions of a Competitive Electric Service Agreement, substantially in the form of the model ESA. The agreement requires the supplier to:

- Provide all-requirements service
- Allow customers to exit the CEC Program any time with no penalty or fee
- Agree to specified customer service standards
- Comply with all requirements of the DPU and the local distribution company

⁴ The Competitive Electric Service Agreement (ESA) serves as the binding contract between the Town of Canton and the Competitive Supplier.

The Town will not enter into an ESA with a competitive supplier unless the ESA is fully consistent with its Department-approved Plan.

The Town will issue an RFP for price bids from suppliers that meet the threshold criteria and agree to the terms and conditions prescribed in the ESA. If none of the bids are satisfactory, the Town will reject all bids and repeat the solicitation as often as needed until market conditions yield a price that is acceptable to the Town.

The Town will solicit bids for power supply that meets the Massachusetts Renewable Portfolio Standard (RPS) requirements and for a supply containing additional renewable energy over and above the RPS requirements. The Town will seek a variety of bids that include renewable electricity from different sources, and will choose the proposal that offers what the Town determines to be the best combination of environmental benefit and price.

The renewable energy in the power supply will be documented using RECs. The RECs used for RPS compliance will be created and recorded in the New England Power Pool Generation Information System (NEPOOL GIS). RECs in excess of the RPS requirements will be certified as having been retired and not re-sold, either through the NEPOOL GIS, another regional tracking system, or third-party certification.

b. Implement public education effort, including notice of the pre-launch opt-out period

Once a winning supplier is selected, the Town will implement a comprehensive public education effort.

The delivery of a public education effort and associated materials are pivotal to ensuring clarity, participation, and enthusiasm for the aggregation. The Town will use a variety of channels to communicate the CEC Program's objectives, the primary terms and conditions of the contract, the right to opt out of the CEC Program, and the related Program options.

The public education plan will include both broad-based efforts and an Opt-Out Notice to be mailed to every eligible customer.

Please see Attachment A for the Town's Education and Outreach Plan (Education Plan), which sets forth in detail the efforts the Town will undertake.

Opt-Out Notice

As a part of the Town's public education and outreach efforts, an Opt-Out Notice will be mailed to every eligible customer after the electricity supply contract is signed and before CEC Program launch. The notice will be an official Town communication, and it will be sent in an envelope clearly marked as containing time-sensitive information related to the Program. The notice will: (1) introduce and describe the CEC Program; (2) inform eligible customers of their right to opt out and that they will be automatically enrolled if they do not exercise that right; (3) explain how to opt out; and (4) prominently state all CEC Program charges and compare the price and primary terms of the Town's competitive supply to the price and terms of utility Basic Service.

The direct mailing will include a language access document, an opt-out reply card, a postage-paid return envelope, and a Product Summary Form.⁵ The language access document will provide instructions in 26 languages to have

⁵ The Product Summary Form will be the same as the Contract Summary Form that the DPU specifies for competitive retail suppliers, with minor text edits to make the form appropriate for participants in a municipal aggregation program. For example, because aggregation program participants do not sign a contract, the term "contract" will be replaced by "Product."

the Opt-Out Notice translated. The reply card will identify the date by which the return envelope must be postmarked in order for the customer to be opted out prior to being enrolled.

The Opt-Out Notice and reply card will be designed by the Town and printed and mailed by the Competitive Supplier, who will process the opt-out replies. An exemplar Opt-Out Notice is provided with this Plan as Attachment B-1. An exemplar language access document cover sheet is provided as Attachment B-2. An exemplar opt-out reply card is provided as Attachment B-3. An exemplar opt-out reply card return envelope is provided as Attachment B-4. An exemplar Product Summary Form is provided as Attachment B-5.

c. Enroll eligible customers that do not opt out and provide service, including information disclosure

After the completion of the opt-out period, the Competitive Supplier will enroll into the CEC Program all eligible customers that did not opt out. Customers whose Opt-Out Notices are returned to the Competitive Supplier as undeliverable will not be automatically enrolled.

The enrollments shall commence no sooner than 37 days after the mailing of the Opt-Out Notice. All enrollments and other transactions between the Competitive Supplier and the local distribution company, Eversource, will be conducted in compliance with the relevant provisions of DPU regulations, Eversource's *Terms and Conditions for Competitive Suppliers* (as amended or superseded from time to time), and the protocols of the Massachusetts Electronic Business Transactions Working Group.

Once customers are enrolled, the Competitive Supplier will provide all-requirements power supply service. The Competitive Supplier will also provide ongoing customer service and process new customer enrollments, ongoing opt-outs, opt-back-ins, and customer selections of Program Options. As explained below under Section V.2. Reliability, the local distribution company remains responsible for and is the contact entity related to outages and other local delivery issues.

As new eligible customers move into the Town, they will have an opportunity to join the Program. New eligible customers will initially be placed on utility Basic Service. They will then receive an Opt-Out Notice and will be enrolled in the aggregation unless they choose to opt out within the opt-out period.

Customers may proactively enroll by contacting the Program. Customers that proactively enroll in the Program will be sent a Product Summary Form for the product (option) they selected.

As part of its ongoing service, the Town will provide the disclosure information required by G.L. c. 164, § 1(F)(vi) and 220 C.M.R. § 11.06. The Town has requested a waiver from the requirement that the disclosure label be mailed to every customer and seeks permission instead to provide the information through alternative means, including press releases, postings at Town Hall, and postings on the Program website. Please see Attachment A for the Education Plan which provides greater detail about the Town's alternative disclosure strategy.

In a prominent location on the Town's website, the Town will provide an appropriate link to the dedicated Program website, in addition to basic information about the Plan. The Plan and supporting documents will be available and updated on the Program website.

d. Submit reports to the DPU and DOER

As specified by the DPU and DOER, the Town will report on the status of the Program, including all information requested by the DPU or DOER.

3. Funding

The costs of the Program will be funded primarily through the supply charge paid by CEC Program participants through the supply contract.

The principal Program cost will be the Competitive Supplier's charge for the power supply. This charge will include the costs of RECs and will be established through the competitive solicitation for a supplier.

The administrative costs of the Program will be funded through a per kilowatt-hour adder that will be included in the supply price and paid by the Competitive Supplier to the Consultant, as specified in the Competitive Electric Service Agreement. This fee will cover the services of the Consultant, including developing and implementing the Plan and Education Plan, managing public outreach efforts, managing the DPU approval process, managing the supply procurement process, providing customer support, interacting with the local distribution company, monitoring the supply contract, and providing ongoing reports. This charge has been set for the initial term of the Consultant's contract at \$0.001 per kilowatt-hour.

In addition, the Town may direct the Competitive Supplier to include in the supply price an Operational Adder of up to \$0.001 per kilowatt-hour to be payable by the Competitive Supplier to the Town. Funds collected through the Operational Adder shall be used to support the operational costs of the Program, including, for example, 1) personnel costs associated with a staff position, one of the responsibilities of which is to assist with the Program; and 2) REC purchases.

The determination of whether to collect the Operational Adder will be made by the Select Board, with guidance from the Town Administrator and input from the Town's Energy Advisory Committee. The criteria will be the cost of electricity and the incremental value that the Town could create for Program participants through the use of Operational Adder funds. The Select Board will make this determination in connection with entering the initial ESA and each subsequent ESA.

If the Town collects the Operational Adder, the rate will be established by the Town Administrator based on 1) an assessment of the percentage of staff time that will be spent on the Program; 2) the cost of that time, i.e., salary, benefits, and overhead; and 3) a projection of revenue based on a projection of Program sales. The Town Administrator will review the Operational Adder annually, and adjust the rate as appropriate.

Town staff funded by the Operational Adder will perform Program tasks that are not performed by the Consultant, including acting as a liaison between the Consultant and the Town, posting Program information in Town buildings and on the Town website social media accounts; answering questions from residents and business that contact the Town directly; distributing Program information to other Town departments; and performing public education over and above the public education provided by the Consultant. The Town Administrator will oversee the work of such staff, and ensure that there is no overlap with the consultant and that Operational Adder funds are used only to support activities that are related to the Program.

4. Rate Setting and Other Costs to Participants

As described above, the Program's electricity supply charge will be set through a competitive bidding process and will include the administrative adder and the operational adder, if any. Prices, terms, and conditions will vary by Program Option and may differ by customer class. For each customer class, prices will be fixed for periods at least as long as the utility Basic Service price period for the class.⁶

⁶ Basic Service pricing periods vary by customer class. For residential and small business customers, the prices change every six months. For medium and large business customers, prices change quarterly.

The Town will notify customers of any change in product price or renewable energy content consistent with all notification requirements for the competitive supply market required by the Department of Public Utilities that are applicable to municipal aggregations. At a minimum, the Town will notify Program participants of any change in Program price or renewable content (including a change at the start of a new supply period) through a direct mail notice at least 30 days prior to any such change. The notice will contain the new Program price, term, fees, and renewable energy content, and will contain the applicable Basic Service rate and inform participants that they may opt out of the Program at any time and return to Basic Service at no charge. The Town will also issue a media release and social media posts, post a notice in Town Hall, and post a notice on the Town website and the Program website.

If the Town seeks to change the voluntary renewable energy content for any option, it will notify Program participants of the change as described above. Customers enrolled in an opt-in option that will change voluntary renewable content will be informed that they must affirmatively re-enroll in the new option (or affirmatively enroll in another option or opt-out) or they will be returned to Basic Service. Customers enrolled in Canton Standard Green (or an opt-in option where the renewable energy content does not change) will be notified that they will be renewed in their current option unless they opt out.

If there is a change in law (i.e., “regulatory event” or “new taxes” per Article 18 of the ESA) that results in a direct, material increase in costs during the term of the ESA (see Article 18 of the ESA), the Town and the Competitive Supplier will negotiate a potential change in the CEC Program pricing. At least 30 days prior to the implementation of any such change, the Town will notify Program participants through a direct mail notice and by issuing a media release and social media posts and posting a notice in Town Hall and on the Municipal website and Program website (Consumer Notification). The Town will notify the DPU Consumer Division prior to the implementation of any change in Program pricing related to a change in law. Such DPU communication shall occur no less than ten business days prior to the Consumer Notification and include copies of the direct mail notice, all media releases, Town Hall and website postings, and other communications the Town intends to provide to customers regarding the change in price.

The Program affects only customers’ electricity supply charges. Delivery charges will be unchanged and will continue to be charged by the local distribution company in accordance with tariffs approved by the DPU. Also, low-income discounts provided by the local distribution company will continue to be applied.

Participants will continue to receive one bill from their local distribution company that includes both the electricity supply-related charge and their local distribution company’s delivery charges. Required supply-related taxes will be included as part of the electricity supply charge. Customers are responsible for identifying and requesting an exemption from the collection of any tax by providing appropriate documentation to the Competitive Supplier.

5. Method of Entering and Terminating Agreements with Other Entities

The Town’s process for entering, modifying, enforcing, and terminating all agreements associated with the Plan will comply with the Town’s charter, federal and state law and regulations, and the provisions of the relevant agreement.

The process for the Town entering into an ESA with the Competitive Supplier is described above in Section IV.2.a.

If the Town determines that it requires the services of an aggregation consultant after the expiration of the currently applicable agreement with MassPowerChoice, the Town will solicit proposals for, and evaluate potential aggregation consultants using a competitive procurement process or alternative procedure which the Town determines to be in the best interest of its residents and businesses and consistent with all applicable local, state,

and federal laws and regulations.

6. Rights and Responsibilities of Program Participants

All participants will have the right to opt out of the Program at any time without charge. They may exercise that right by any of the following: 1) calling the Competitive Supplier's toll-free number; 2) submitting the opt-out form on the Program website; 3) contacting their local distribution company and asking to be returned to Basic Service; or 4) enrolling with another competitive supplier.

All participants will have the consumer protection provisions of Massachusetts law and regulations, including the right to question billing and service quality practices. Customers will be able to ask questions of and register complaints with the Town, the Consultant, the Competitive Supplier, the local distribution company, and the DPU. As appropriate, the Town and Consultant will direct customer complaints to the Competitive Supplier, their local distribution company, or the DPU.

Participants will be responsible for paying their bills, for providing access to metering and other equipment necessary to carry out utility operations, and for complying with all applicable laws, regulations, and tariffs.

7. Extension or Termination of Program

No later than 90 days prior to the end of the term of the initial Electric Service Agreement, the Town will solicit bids for a new electricity supply and plans to continue the Program with the same or a new competitive supplier. When the Town determines that it is timely to solicit bids, it will repeat the procurement steps described in Section IV.2.a. If the Town receives a satisfactory price bid, it will enter a new ESA with the winning bidder.

At least thirty days prior to the effective date of a new ESA, Program participants will be informed of the ESA and any price or program changes through the notification process described in § IV.4.

Although the Town is not contemplating a termination date, the Program could be terminated upon the termination or expiration of the Competitive Electric Service Agreement without any extension, renewal, or negotiation of a subsequent supply contract, or upon the decision of the Town Administrator with the approval of the Select Board to dissolve the Program effective on the end date of any outstanding supply agreement or for other legal or contractual reason. In the event of termination, customers would be returned to their local distribution company's Basic Service via Electronic Data Interchange (EDI) by the Competitive Supplier in accordance with the rules set forth in the Electronic Business Transactions (EBT) Working Group Report unless the customer chooses an alternative competitive supplier.

The Town will notify the local distribution company of the planned termination or extension of the Program. In particular, the Town will provide notice to the local distribution company: (1) 90 days prior to a planned termination of the Program; (2) 90 days prior to the end of the anticipated term of the Program's ESA; and (3) four business-days after the successful negotiation of a new electricity service agreement.

The Town will notify its residents and businesses of Program termination by issuing a media release and posting a notice on the Town website. In addition, customers will receive notice of a supplier change on their bill from their local distribution company.

The Town will notify the Director of the DPU's Consumer Division 90 days prior to a planned termination of the Program. Such communication shall include copies of all media releases, town clerk and website postings, and all other communications the Town intends to provide to its residents and businesses regarding the termination of the Program and the return of participants to utility Basic Service.

V. Substantive Requirements

The Aggregation Statute also requires that the Plan satisfy three substantive requirements:

- Universal access
- Reliability
- Equitable treatment of all customer classes

The Town's CEC Program will satisfy all three requirements, as discussed below.

1. Universal Access

The Aggregation Plan provides for universal access by guaranteeing that all customer classes will be included in the Program under equitable terms.

Most importantly, all customers will have access to the Program. All eligible customers will be automatically enrolled in the Program unless they choose to opt out.

All customers will have the right to opt out of the Program at any time at no charge. Customers that opt out will have the right to return to the Program at any time. Customers that opt out and then return to the Program will be offered a price that reflects market conditions at the time of their return.

2. Reliability

Reliability has both physical and financial components. The Program will address both of these components through the ESA with the Competitive Supplier. From a physical perspective, the ESA commits the Competitive Supplier to provide all-requirements power supply and to use proper standards of management and operations (ESA, Article 7). The local distribution company will remain responsible for delivery service, including the physical delivery of power to the consumer, maintenance of the delivery system, and restoration of power in the event of an outage. From a financial perspective, the ESA requires the Competitive Supplier to pay actual damages for any failure to provide supply at the contracted rate (i.e., to pay the difference between the contract rate and the utility supply rate). The ESA also requires the Competitive Supplier to maintain insurance (ESA, Article 16). Accordingly, the Program satisfies the reliability requirement of the Aggregation Statute.

3. Equitable Treatment of all Customer Classes

The Aggregation Statute requires "equitable" treatment of all customer classes. The DPU has determined that this does not mean that all customers must be treated "equally," but rather that similarly-situated classes be treated "equitably." In particular, the DPU has allowed variations in pricing and terms and conditions among customer classes to account for the disparate characteristics of those classes.

The Program makes several distinctions among groupings of customers. First, the Program may distinguish among customer classes by soliciting separate pricing for each of those classes. The Program will use the customer classes used by the local distribution company for Basic Service.

Second, the Program will distinguish among customers receiving different Program Options. Customers will be charged the price associated with the Program Option they receive.

Third, the Program makes distinctions according to customers' enrollment scenario. Those distinctions are described in the two tables below:

Enrollment procedures

Enrollment scenario	Residential	Small C&I	Medium C&I	Large and Very Large C&I
Eligible customer at program initiation	An Opt-Out Notice will be mailed to all eligible customers before Program launch. After the completion of the opt-out period, the Competitive Supplier will enroll eligible customers that did not opt out. The enrollments shall commence no sooner than 37 days after the mailing of the Opt-Out Notice.			
New eligible customers identified after Program initiation	An Opt-Out Notice will be mailed to all new eligible customers identified after Program initiation. After the completion of the opt-out period, the Competitive Supplier will enroll eligible customers that did not opt out. The enrollments shall commence no sooner than 37 days after the mailing of the Opt-Out Notice.			
Competitive supply customers at Program initiation who wish to enroll in the Program after their competitive supply contract ends	Customers may request enrollment by contacting Program customer support or the Program’s electricity supplier.			
Customers who opt out and subsequently wish to enroll	Customers may request enrollment by contacting Program customer support or the Program’s electricity supplier.			

Pricing procedures

Enrollment scenario	Residential	Small C&I	Medium C&I	Large and Very C&I
Eligible customer at program initiation	Standard Program pricing ⁷			
New eligible customers identified after Program initiation	Standard Program pricing		Market-based pricing ⁸	
Competitive supply customers at Program initiation who wish to enroll in the Program after their competitive supply contract ends	Standard Program pricing		Market-based pricing	
Customers who opt out and	Market-based pricing			

⁷ Standard Program pricing is the price set in the ESA.

⁸ Market-based pricing is a price based on market conditions at the time the customer seeks to enroll in the program.

subsequently wish to enroll	
------------------------------------	--

VI. Planned Schedule

Milestone	Day Estimate
RFQ for competitive supplier issued	Day 1
RFP for final supply prices issued	Day 30
Electricity Supply Agreement executed	Day 44
Broad-based educational campaign begins, including the announcement of supply contract and pricing and an update of Program web site, and including an opt-up campaign for greener power.	Day 45
Opt-Out Notice mailed to customers	Day 55
Opt-out postmark deadline	Day 88
Earliest date program enrollment may begin	Day 92

The planned schedule is presented for illustrative purposes. The final schedule will be established when the Town receives DPU approval.⁹

VII. Conclusion

The CEC Program meets all of the requirements of the Aggregation Statute, including universal access, a reliable power supply, and equitable treatment of all customer classes, and will bring the benefits of renewable energy and electricity choice to the town's residents and businesses.

⁹ The planned schedule is designed to give the Competitive Supplier sufficient time to satisfy EDI testing requirements. However, the schedule will be adjusted if additional time is needed to meet those requirements.
