

An important message about a change in your electricity supply price

October 16, 2026

Your electricity account is enrolled in Foxborough Power Forward, our Town's group electricity buying program. Since launching in 2017, the program has saved Foxborough electricity customers **more than \$7.5 million** compared with National Grid's prices.

Through the program, you receive a Foxborough price for the electricity supply part of your National Grid bill. Within the program, you are enrolled in the **Power Forward Green** option, which provides 100% of your electricity from renewable sources in the New England region.

Current program prices will expire in November, and new, 2-year prices will take effect.

- Your current electricity supply price is 16.607 ¢/kWh. Your new electricity supply price will be **19.091 ¢/kWh**. The current prices were secured in 2024, and electricity prices have increased since then.
- Your new price will be stable from November 2026 until November 2028.
- Your new price will be **lower** than National Grid's current residential price. (See the table for National Grid's prices.) *Future savings compared with National Grid cannot be guaranteed.*

Your new electricity supply price:

19.091 ¢/kWh

Look for it on your December bill.
