

An important message from the Town of Nantucket about a change in your electricity supply price

September 29, 2026

To our valued program participants,

You are currently enrolled in Nantucket PowerChoice, the Town's electricity aggregation program, which provides a competitive Nantucket-based price for the electricity supply portion of your National Grid bill.

In November, the current electricity supply contract for Nantucket PowerChoice will end, and a new, 12-month contract will begin, providing stable pricing through October 2027.

Electricity supply prices have increased since the Town secured its current contract in 2024. As a result, your Nantucket PowerChoice price will increase when the new contract takes effect.

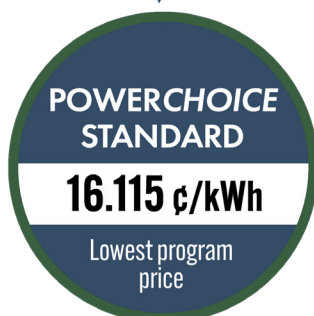

What this means for you:

- Your electricity supply price will change to **16.115 ¢/kWh**.
- The new price will take effect with your November meter read and will first appear on your December National Grid bill under "Supply Services."
- Your price is lower than National Grid's current residential price of 17.185 ¢/kWh and includes unique community benefits. (See the "Additional information" section for details.)
Because National Grid's prices change and future prices are unknown, future savings compared with National Grid cannot be guaranteed.
- Your electricity supplier will remain First Point Power, as it is now.

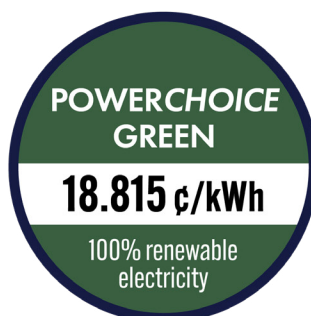

It's your decision. Make the choice that's right for you.

- ▶ **TAKE NO ACTION.** Your enrollment in Nantucket PowerChoice Standard will renew automatically at 16.115 ¢/kWh in November, and you will see the new price on your December National Grid electric bill.
- ▶ **GO GREEN!** Opt into the PowerChoice Green option and receive 100% of your electricity from solar projects in New England for 18.815 ¢/kWh.
- ▶ **OPT OUT.** There is no fee or penalty to opt out of Nantucket PowerChoice. You may do so at any time by visiting NantucketPower.org or by calling customer support at 844-241-8598. If you opt out, you will be returned to National Grid's Basic Service price within one to two billing cycles. See the table for National Grid's current prices.

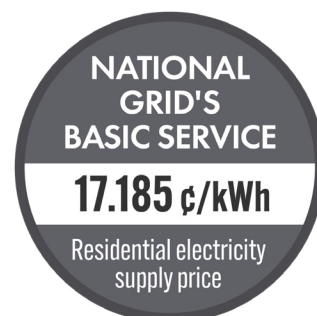

Your enrollment will renew here automatically.

PowerChoice Standard comparison:

Supply product details	CURRENT	NEW	Compare to National Grid
Electricity supply price	13.967 ¢/kWh	16.115 ¢/kWh	17.185 ¢/kWh - residential. 15.568 ¢/kWh - commercial. 11.024 ¢/kWh - industrial.
Price term	24 months	12 months	6 months - residential & commercial 3 months - industrial
Price period	November 2024 to November 2026	November 2026 to November 2027	August 1, 2026, to January 31, 2027, residential & commercial. August 1 to October 31, 2026, industrial.
Electricity from renewable sources in the New England region (MA Class I RECs)	30%	30%	30%
Electricity from other clean or renewable sources (other RECs)*...	39%	39%	39%
Total electricity from renewable sources	69%	69%	69%

* State law requires all electricity suppliers to purchase renewable energy certificates (RECs) from other sources, including sources that are not new, are renewable but not clean, such as waste to energy, or are clean but not renewable, such as nuclear.

Additional information

- **Nantucket's municipal aggregation was unanimously approved** at the 2016 Annual Town Meeting (Article 104) as a way to help the local community to save money, protect against unpredictable seasonal price swings, and provide a vetted alternative to National Grid's Basic Service with strong consumer protections. Since its 2017 launch, Nantucket PowerChoice has saved island residents and businesses **more than \$35.2 million** compared with National Grid's prices, though future savings cannot be guaranteed.
- **Your participation advances Nantucket's sustainability through local renewable energy investments.** Nantucket PowerChoice directly supports the **Nantucket Local SOLAR Rebate Program**, which provides up to **\$10,000** to program participants who install solar on their primary Nantucket properties. To date, the program has awarded more than **\$800,000** to local residents, helping to fund 165 solar projects that have added nearly **1.5 megawatts** of renewable energy capacity to Nantucket's local grid, strengthening the island's sustainability and energy resilience.
- Additionally, Nantucket PowerChoice has purchased RECs from 1,726 megawatt-hours of electricity generated by the Nantucket High School wind turbine, greening our electricity supply, while reinvesting \$55,600 directly into Nantucket Public Schools.
- **Your electricity supplier will remain First Point Power, which has consistently provided excellent customer service to our community.** While "First Point Power - Nantucket PowerChoice" will appear on the supply portion of your bill, your primary relationship for electricity services remains with National Grid. You will continue to contact them for any power outages or bill-related questions. National Grid will also continue to send your electric bill, which will remain the only electric bill you receive as a participant in Nantucket PowerChoice.
