

An important message about a change in your electricity supply price

October 14, 2026

SHARON
POWERCHOICE

Your electricity account is enrolled in Sharon Power Choice, our Town's group electricity buying program. Since launching in 2021, the program has saved Sharon electricity customers **more than \$9.9 million** compared with utility electricity supply prices, though future savings cannot be guaranteed.

Through the program, you receive a Sharon Power Choice price for the Supply Services portion of your National Grid electric bill. Within the program, you are enrolled in the **Sharon Power Choice Green** option, which provides 100% of your electricity from renewable sources.

In January, the current program prices will expire and new, 3-year prices will take effect.

- Your current electricity supply price is 15.490 ¢/kWh. Your new price will be **18.355 ¢/kWh**. Electricity supply prices have increased since 2023, when the current prices were secured.
- Your new price will be fixed and stable from January 2027 until January 2030.
- You will continue to receive 100% of your electricity from renewable sources.

Your new electricity supply price:

18.355 ¢/kWh

Look for it on your February bill.

It's your decision. Make the choice that's right for you.

- ▶ **TAKE NO ACTION.** Your enrollment will renew automatically in the Sharon Power Choice Green option at 18.355 ¢/kWh in January. You will see the new price on your February National Grid electric bill.
- ▶ **CHOOSE SHARON POWER CHOICE BASIC.** The Sharon Power Choice Basic option provides the minimum required from renewable sources and the lowest price in the program at 15.799 ¢/kWh.
- ▶ **OPT OUT.** Participation is not required. There is no fee or penalty to opt out, and you may do so at any time. If you opt out, you will receive National Grid's current Basic Service price. See the table for National Grid's current prices.

Both Sharon Power Choice prices are fixed until January 2030.

To choose the Sharon Power Choice Basic option or to opt out, visit SharonPowerChoice.com or contact customer support with our program consultants at 855-854-7498.

Sharon Power Choice Green comparison:

Price comparison

Price information		CURRENT	NEW	Compare to National Grid
Price		15.490 ¢/kWh	18.355 ¢/kWh	17.185 ¢/kWh - residential. 15.568 ¢/kWh - commercial. 11.024 ¢/kWh - industrial.
Price period		January 2024 to January 2027	January 2027 to January 2030	August 1, 2026, to January 31, 2027, residential & commercial. August 1 to October 31, 2026, industrial.

Electricity from renewable sources (% of total)

Renewable energy source	Required vs added	CURRENT	NEW	Compare to National Grid
Electricity from new renewable sources in the New England region (MA Class I RECs)	Required	30%	30%	30%
	Added by Sharon	70%	70%	0%
	Total required and added *	100%	100%	30%

* In addition to purchasing the renewable energy shown in the table, the program's electricity supplier is required by state law to purchase renewable energy certificates (RECs) from other sources, including sources that are not new, are renewable but not clean, such as waste to energy, or are clean but not renewable, such as nuclear. This purchase must match 39% of participants' total electricity use.

Additional information

- **National Grid will remain your electric utility** and will continue to deliver your electricity, send your bill, and address power outages. But on your bill, your electricity supplier will change to "First Point - Sharon Power Choice."
- **If you recently signed a private electricity supply contract and also you received this notice**, this mailing list may have been created before you signed your contract. **If you wish to remain in your contract, you should opt out of Sharon Power Choice.** Opt out online at SharonPowerChoice.com or by calling customer support with our program consultants at 855-854-7498.
- **The Sharon Power Choice Standard option is retiring.** Currently, Sharon Power Choice has three options, with most participants enrolled in the middle option, which is Sharon Power Choice Standard. The price of this option has included a small premium for purchasing an additional 20% of participants' electricity from renewable sources, above minimum state requirements. The goal was to build demand for renewable energy, which would drive the development of new renewable energy projects.

It has now become difficult to build new renewable energy projects because of changes at the federal level. With higher demand no longer able to drive the construction of new projects, the Town cannot justify the extra cost to participants. As a result, the Sharon Power Choice Standard option is being retired as the new prices take effect. All participants in the Sharon Power Choice Standard option will be moved to the Sharon Power Choice Basic option, which includes only the minimum from renewable sources required by state law with no additional premium. The Sharon Power Choice Green option remains available for those who wish to opt up and buy electricity that is 100% from renewable sources.
