

Program Overview

Valley Green Energy is an electricity supply program that gives residents and business owners in Amherst, Northampton, and Pelham more choice and control over how we power our communities. The program is a group electricity purchasing program that changes the electricity supply price on your electric bill. More than 200 other cities and towns in Massachusetts have similar programs.

Using the bulk buying power of our communities, Valley Green Energy provides:

- Stable and consistent pricing.
- The potential for savings, though savings cannot be guaranteed.
- The freedom to leave at any time with no fee or penalty.

Valley Green Energy has two options for each community. Choose the one that's right for you.

New program participants will be automatically enrolled in VGE Basic. VGE 100% Green provides 100% of your electricity from renewable sources and is available by request. Choose online or by phone.

Amherst and Pelham

Northampton

Prices are fixed until November 2028.

Note that Eversource's and National Grid's future prices are unknown, so future savings cannot be guaranteed.

Most new electricity accounts will be eligible for automatic enrollment.

Have Eversource's or National Grid's Basic Service?

If you did not sign a private electricity supply contract, your account will be eligible for automatic enrollment within a few months, and you will receive a notification in the mail from your City or Town. State law requires the automatic enrollment model, but you are free to opt out before being automatically enrolled.

Have a private electricity supply contract?

Your account will not be eligible for automatic enrollment, but you can request enrollment online at ValleyGreenEnergy.org or by contacting customer support with our program consultants at **844-202-6033**.

Participation is never required, and you are free to opt out at any time with no fee or penalty.

That means you can opt out before being enrolled and remain with your utility's electricity supply price, or you can try the program and opt out at any time in the future.

How Valley Green Energy Works

Valley Green Energy changes your electricity supplier and the price that your electric utility uses to calculate the supply charge on your bill, but it does not replace your electric utility.

Supply

Direct Energy buys electricity for you.

Delivery

Your utility (Eversource or National Grid) continues to deliver your electricity.

Customer

You receive electricity with no change in service.

Total Supply Services \$

In Northampton, two key changes to your National Grid electric bill:

1. Your electricity supplier will appear as **Direct Energy - Valley Green NHM.**

2. Your electricity supply price will change to a Valley Green Energy price.

Everything else remains the same!

Your electric utility continues to:

Deliver your electricity with no interruption and address power outages.

Send your electric bill and accept bill payments (this is the only electric bill you will receive as a participant).

Provide a low-income discount or fuel assistance if you currently receive those benefits.

If you are participating in community solar, or you are receiving net metering credits or incentive payments for electricity produced by solar panels on your property, you will continue to receive your credits or incentive payments as a participant in Valley Green Energy with no change in how they are calculated. Their calculation is not connected to your electricity supply price.
