

An important message about a change in your electricity supply price

October 16, 2026

Your electricity account is enrolled in **Grafton Energy Choice**, our Town's group electricity buying program. Through the program, you receive a Grafton Energy Choice price for the Supply Services portion of your electric bill. You are enrolled in the **Energy Choice Green option**, which provides 100% of your electricity from renewable sources.

Since the program launched in 2017, Grafton residents and businesses have saved more than **\$15.2 million** compared with National Grid's prices, though future savings cannot be guaranteed.

In November, the current program prices will expire and new, 12-month prices will take effect. Electricity prices are higher now than when Grafton locked in the current prices. As a result, Grafton Energy Choice prices are increasing.

- Your current electricity supply price is 16.195 ¢/kWh.
- Your new price will be **19.682 ¢/kWh**. This price will be in effect from November 2026 until November 2027.
- You will continue to receive 100% of your electricity from renewable sources.

Your new electricity supply price:

19.682 ¢/kWh

Look for it on your December bill.

It's your decision. Make the choice that's right for you.

- ▶ **TAKE NO ACTION.** Your enrollment in the Energy Choice Green option will renew automatically at 19.682 ¢/kWh in November. You will see the new price on your December National Grid electric bill.
- ▶ **CHOOSE ENERGY CHOICE BASIC.** The Energy Choice Basic option provides the minimum from renewable sources required by law for 16.984 ¢/kWh.
- ▶ **OPT OUT.** Participation is not required. There is no fee or penalty to opt out, and you may do so at any time. If you opt out, you will receive National Grid's current Basic Service price. See the table for National Grid's price.

To choose Energy Choice Basic or opt out, visit GraftonEnergyChoice.com or contact customer support with our program consultants at 844-241-8597.

Energy Choice Green comparison:

Price comparison

Price information	CURRENT	NEW	Compare to National Grid
Price	16.195 ¢/kWh	19.682 ¢/kWh	17.185 ¢/kWh - residential. 15.568 ¢/kWh - commercial. 21.893 ¢/kWh - ind. SEMA. 21.784 ¢/kWh - ind. WCMA.
Price period	October 2024 to November 2026	November 2026 to November 2027	August 1, 2026, to January 31, 2027, residential & commercial. November 1, 2026, to January 31, 2027, industrial.

Electricity from renewable sources (% of total)

Renewable energy source	Required vs added	CURRENT	NEW	Compare to National Grid
Electricity from new renewable sources in the New England region (MA Class I RECs)	Required	30%	30%	30%
	Added by Grafton	70%	70%	0%
	Total required and added *	100%	100%	30%

* In addition to purchasing the renewable energy shown in the table, the program's electricity supplier is required by state law to purchase renewable energy certificates (RECs) from other sources, including sources that are not new, are renewable but not clean, such as waste to energy, or are clean but not renewable, such as nuclear. This purchase must match 39% of participants' total electricity use.

Additional information

- **National Grid will remain your electric utility, and First Point Power will remain your electricity supplier.** National Grid will continue to deliver your electricity, send your bill, and address power outages. On your bill, your electricity supplier will continue to appear as "First Point Power - Grafton Energy Choice."
- **If you recently signed a private electricity supply contract and also you received this notice,** this mailing list may have been created before you signed your contract. **If you wish to remain in your contract, you should opt out of Grafton Energy Choice.** Opt out online at GraftonEnergyChoice.com or by calling customer support with our program consultants at 844-241-8597.
- **Energy Choice Standard is retiring.** Currently, Grafton Energy Choice has three options, with most participants enrolled in the middle option, which is Energy Choice Standard. The price of Energy Choice Standard has included a small premium for purchasing an extra 20% of participants' electricity from renewable sources, above minimum state requirements. The goal was to build demand for renewable energy, which would drive the development of new renewable energy projects.

It has now become difficult to build new renewable energy projects because of changes at the federal level. With higher demand no longer able to drive the construction of new projects, the Town cannot justify the extra cost to participants. As a result, Energy Choice Standard is being retired as the new prices take effect. All participants in Energy Choice Standard will be moved to the Energy Choice Basic option, which includes only the minimum from renewable sources required by state law with no additional premium. The Energy Choice Green option remains available for those who wish to opt up and buy electricity that is 100% from renewable sources.
